

Geological works were realized in the extent of:

- atmogeochemic measurements
- geophysical measurements
- exploratory non-equipped boreholes (Geoprobe probes) - 10 pcs
- hydrodynamic and tracing tests
- sampling work and field measurements
- laboratory work
- drawing up a final report with a risk analysis
- drawing up a feasibility study of remediation

Customer:

Ministry of Environment of the Slovak Republic
Námestie Ľ. Štúra 1
812 35 Bratislava

Contractor of geological works:

ENVIGEO, Inc.
Kynceľovská cesta 2/8
974 11 Banská Bystrica

Geological Survey Results:

- soil and groundwater have been found to be contaminated with substances of petroleum origin (hydrocarbons C_{10} - C_{40} , benzene)
- the presence of an environmental risk from groundwater pollution by substances of petroleum origin (hydrocarbons C_{10} - C_{40} , benzene) has been demonstrated
- the presence of a health risk to the population by inhalation explosion has been demonstrated (due to petroleum hydrocarbons and benzene)
- the remediation of environmental burdens is recommended
- a complex of suitable remediation methods has been proposed

Budget of the geological task: **89 942 €** (excluding VAT)
Solution time: **jan 29, 2014 - apr 29, 2015** (15 months)
